Abstract. Legal awareness is related to lawful compliance, the thing that recognizes it is that in lawful compliance there’s a fear of sanctions. Legitimate mindfulness that there are no sanctions, could be a definition from the lawful community with respect to the appraisal, which has been carried out deductively, the values contained in humans around the existing law or around the law that's anticipated to exist. The inquire about goes up against individuals based on instrumental and standardizing points of view. This investigate strategy is standardizing lawful inquire about, specifically lawful investigate conducted by investigating library materials. Based on the examination that has been done, it can be concluded that open legitimate mindfulness influences legitimate compliance either straightforwardly or by implication. In created social orders, the calculate of legitimate mindfulness contains a coordinate impact on community legitimate compliance. In conventional social orders, open lawful mindfulness has an circuitous impact on lawful compliance. They comply the law not since of their coordinate conviction that the law is sweet, but since they are inquired, indeed implemented by their pioneers, or since of devout orders or convictions.

Keywords: Legal Awareness; Legal Compliance; Sanctions

INTRODUCTION

Legal awareness according to the Great Indonesian Dictionary is a person's awareness of the knowledge that certain behavior is regulated by law. (Diknas, 2007) Legitimate mindfulness at a certain point is anticipated to be able to empower somebody to comply and carry out or not carry out what is disallowed and/or what is requested by law. In this manner, expanding legitimate mindfulness is an critical portion of endeavors to realize law authorization. The result of the moo lawful mindfulness of the community is that individuals don't comply with pertinent lawful controls. The results caused by the need of legitimate mindfulness can be indeed more regrettable in case it hits law authorization officers and administrators. You'll be able envision how the law authorization endeavors will be and the condition of the existing lawful framework and framework (Hasibuan, 2013)

Building legal awareness isn't simple, not everybody has that mindfulness. Law as a social ponder is an institution and control of society. In society, diverse educate are found, each of which is required in society to meet their needs and empower the fulfillment of these needs, since of its work, the community needs the closeness of teach as an understanding of lawful mindfulness. The significance of mindfulness to construct a society that's mindful of the law is anticipated to bolster and make the community regard institutions/rules as a fulfillment of the have to be pine for compliance and law arrange. The part and work of building lawful mindfulness in society are for the most part joined to educate as a complement to society, which can be seen by: 1) Solidness, 2) Giving a social framework for wants in society, 3) Giving a social regulation system within the shape of standards (Hasibuan, 2013). A few of the variables that impact the open are not mindful of the significance of the law are: (1) There is legal uncertainty; (2) Regulations are static; and (3) Inefficient ways of the community to maintain the applicable regulations. (Rahadjo, 1991)

Opposite to the variables over, one of the center of choice within the think about of lawful mindfulness is: (1) The accentuation that the law as an specialist is closely related to the area where a lawful activity takes place; (2) The think about of legitimate awareness does not ought to benefit law as a source of specialist or inspiration for action; and (3) The consider of lawful mindfulness requires perception, not as it were of social issues and the part of law in making strides their lives but too of what they do. (Achmad, 2009). According to Sunaryati Hartono (Hartono), however legal awareness is rooted in society, it is a more rational abstraction than legal feelings that live in society. In other words, legal awareness is an understanding created by legal scholars. This cannot be seen directly in people's lives, but its existence can only be inferred from the experience of social life through a certain way of thinking and interpreting. (Rosana, 2014)

Legitimate mindfulness is related to genuine compliance, the thing that recognizes it is that in legal compliance there's a fear of sanctions. Legitimate mindfulness that there Legitimate mindfulness that there are no sanctions, could be a definition from the lawful community with respect to the appraisal, which has been carried out deductively, the values contained in people nearly the existing law or around the law that's expected to exist. The inquire about stands up to individuals based on instrumental and standardizing points of view. (Rahardjo, 2010) The instrumental perspective says that compliance depends on the ability of the law to shape obedient behavior itself and it is related to the existence of incentives and punishments. So expanding the
seriousness of sanctions is considered an viable way to diminish wrongdoing rates. The standardizing viewpoint relates to the people's conviction within the presence of justice and ethics contained within the law, indeed in spite of the fact that it is opposite to their interface. So on the off chance that the law is felt to be reasonable, the individuals will intentionally comply it, indeed on the off chance that it penances their interface. The individuals too maintain a government, in the event that it is accepted that the government has the ethical right to direct its individuals. The concept of legitimate mindfulness contains components of esteem that of course have been internalized by citizens since childhood and have been institutionalized and imbued. This institutionalization handle in the long run gets to be a rule that's kept up by the community and is embedded through the socialization prepare (Rahardjo, 2010).

Based on the previous description, the problem that will be discussed in this paper is the relationship between legal awareness and legal compliance.

METHODS

This research is normative legal research, namely legal research conducted by researching library materials (library research). Normative legal research includes: (1) research on legal principles; (2) research on legal systematics; (3) research on the level of legal synchronization; (4) legal history research; and (5) comparative law research (Ali, 2011)

RESULTS

Lawful mindfulness is related to lawful compliance, the thing that recognizes it is that in legitimate compliance there's a fear of sanctions. Lawful mindfulness that there are no sanctions, may be a definition from the legitimate community with respect to the evaluation, which has been carried out deductively, the values contained in people almost the existing law or almost the law that's anticipated to exist. The Investigate stands up to individuals based on instrumental and standardizing points of view (Rahardjo, 2010). According to Soerjono Soekanto, there are 4 indicators form legal awareness sequentially (step by step), namely:

1. Legal knowledge; may be a person's information with respect to certain behaviors directed by composed law, specifically approximately what is denied and what is permitted.
2. Legal understanding; a few data possessed by an individual with respect to the substance of the (composed) rules, to be specific around the substance, destinations, and benefits of these directions.
3. Legal attitude; may be a inclination to acknowledge or dismiss the law since of the appreciation or realization that the law is beneficial to human life. In this case, there's as of now an component of appreciation for the run the show of law.
4. Legal behavior patterns; around whether or not a run the show of law in society. On the off chance that a run the show of law applies, to what degree does it apply, and the degree to which does society complies it. Soerjono Soekanto also expressed that the viability of law in society is decided by different components, to be specific the lawful figure itself, law authorization variables, offices components, community lawful mindfulness components, and lawful culture components. The legitimate calculate itself is whether the law meets the juridical, sociological, and philosophical necessities. Within the practice of regulating law within the field, there are times when there's a struggle between legitimate certainty and equity, usually since the conception of equity is an unique detailing, whereas lawful certainty may be a strategy that has been decided normatively. A approach or activity that's not totally based on the law is something that can be advocated as long as the approach or activity does not strife with the law. So in pith, the execution of law does not as it were incorporate law authorization, but too peace support, since the usage of the law may be a handle of harmonization between the values of the rules and genuine behavior designs that point to realize peace.

Several factors cause people to obey the law, namely:

1. Compliance; Compliance is based on the desire of a compensate and an exertion to maintain a strategic distance from the discipline which will be forced in the event that somebody abuses the provisions of the law. There's strict supervision of the run the show of law.
2. Identification; Happens when compliance with the run the show of law exists not since of its inborn esteem, but so that gather enrollment is kept up and there's a great relationship with those who are authorized to apply the run the show of law.
3. Internalization; Somebody complies lawful rules since naturally that acquiescence includes a compensate. The substance are taking after the values of the individual concerned.
4. The interface of the citizens are ensured by the existing legitimate system. Community legitimate mindfulness influences lawful compliance either straightforwardly or in a roundabout way. In created social orders, the figure of lawful mindfulness includes a coordinate impact on community lawful compliance. Individuals comply the law since their souls are mindful that they require the law and the law incorporates a great reason and has overseen society legitimately, accurately, and decently. In traditional societies, public legal awareness has an indirect effect on legal compliance. They comply the
law not since of their coordinate conviction that the law is nice or since they require the law, but they comply the law more since they are inquired, indeed implemented by their pioneers (formal or casual), or since of devout orders or convictions. So in terms of this backhanded impact, the legitimate mindfulness of the community is more to comply the pioneer, religion, conviction, and so on. The current legal problem is the low legal awareness of the community. As a result, many violations of the law occurred. The little things that don't need to happen. For example, deliberately not carrying a SIM because it is only temporary. Violation of the law in a narrow sense means a violation of state laws and regulations because the law by the state is contained in the legislation. The case of not carrying a driver's license means violating the regulations, namely Law no. 14 of 1992 concerning traffic. Many cases of law violations occur in the community.

CONCLUSION

Community lawful mindfulness influences lawful compliance either specifically or by implication. In made social orders, the figure of authentic mindfulness contains a arrange affect on community legal compliance. People comply the law since their souls are careful that they require the law and the law includes a awesome reason and has managed society fittingly, precisely, and sensibly. In conventional social orders, open legitimate mindfulness has an circuitous impact on legal compliance. They comply the law not since of their arrange conviction that the law is sweet or since they require the law, but they comply the law more since they are asked, indeed upheld by their pioneers (formal or casual) or since of devout orders or convictions. The counsel given is that for any non-compliance with the law as a result of not being mindful of the law within the areas of criminal law, respectful law, regulatory law, and/or sacred law, an seriously case settlement can be taken after up through a consultancy and lawful help.
